Space online center

2021 - 2022

- Static web site development
- Customer Management
- CSC Services

EDUCATION

FULLSTACK WEB DEVELOPMENT

Brototype

Django and React

B.SC COMPUTER SCIENCE

iCAS IHRD Vattamkulam, Edappal

2017 - 2020

FULLSTACK DEVELOPER

Soften Technologies, Ernakulam - Intern

2020 - 2021

- Website development using django
- MySQL as database

PROJECTS

ACCORD CHAT APP

Key Features

- Multiple Chat Modes - Private, Group and Community
- Video calling
- Subscription based premium plan
- Can send media files and emoji in chat. Thumbnails will be generated for media Files
- Online, typing status along with read receipts and delivery status
- Live Notifications and Push Notifications
- Progressive Web App
- Create different servers which will act as communities which can host multiple channels
- Channel chat can also have threads, which acts as sub category to channel.
- Users can browse all servers, or according to category and join them
- Email verification.
- All other basic features of a social media application

Technologies Used

Backend - Django

- Channels - for chat, web rtc signaling, presence server, live Notifications
- Redis - caching and storing relevant information of presence server
- Celery - Executing background tasks and automate certain tasks like sending emails, checking subscription end date notifying users etc
- Signals - for triggering notifications, generate thumbnails of uploaded files etc...
- Stripe - Payment Gateway
- JWT Authentication

Frontend - React

- WEBRTC for Video calling
- WebSocket - chatting and similar real time communications
- Redux - state management
- Service Workers - for push notifications, and caching for PWA

T4MAG - BLOG

Django - Nextjs Blog app

Users can sign in and follow different authors or categories. Users can register as authors, making them able to create new posts, categories and tags. Django is used in the backend along with nextjs in the frontend.
